

GPS delivers IS Machines to Bangkok Glass

Published: February 07, 2017
Author: **Greg Morris**

GPS has just supplied a single 8-section machine and 16 exchange sections both with a centre distance of 5", for Bangkok Glass's furnace 4 repair at its Pathumthani plant.

This means that all four lines will consist of GPS machine technology.

Essen, Germany-based GPS said it was glad to satisfy its long-term customer based in Thailand and is also looking forward to being a part of its future projects.

The installation of the equipment is planned for the 2nd quarter of 2017.
