PRODUCTS
AT GLASSTEC

CONTAINER PRODUCTION

Glasproduktions-Service GmbH (GPS) is presenting an impressive five innovative new patents at this year's glasstec trade fair. The GPS experts regularly develop new solutions for the container glass industry that increase the precision, speed and efficiency of IS machines.

The five new patents by GPS are all different innovative modules: a new gob delivery system, a safety door, a system for automatic lubrication, a shear spraying system and a new cooling unit for glass containers on the dead plate. Not only do these new IS machine sub-systems have unique optimised designs, geometries and mechanics, they are also revolutionary in terms of their suspension and mounting concepts.

on the factors of sustainability and environmental performance when developing new patents to ensure that they always contribute to reducing energy requirements and minimising energy losses in the production process.

because all-inclusive solutions do not necessarily meet the container glass manufacturers' requirements. Sometimes all an IS machine needs is a professional upgrade or the replacement of individual components to achieve improvements in efficiency and product quality. Based on this knowledge and its self-imposed standards of excellence, GPS develops optimum solutions in perfect quality for customers around the globe - at unbeatable value for money.

“ Making glass is an art. The tools you need are made by GPS ”

QUALITY, RELIABILITY, EFFICIENCY AND PERFORMANCE

GPS represents made-in-Germany quality, process reliability, efficiency and environmental performance. This is impressively proven by the five patents that have been granted to the German experts.

The GPS innovations will deliver improved product and production quality because they allow the IS machines to turn out more uniform glass products. The innovative modules also help container glass manufacturers to make their production processes more efficient. GPS is a company with high quality standards. Therefore it always focuses

The modules are also very simple and convenient to handle, control and maintain.

RESPONDING TO THE NEEDS OF THE CONTAINER GLASS INDUSTRY

GPS is a leading developer and supplier catering to the needs of the international container glass manufacturing industry. The specialist company's product portfolio includes IS machines and components, servo mechanisms, feeders and conveyors as well as control and drive systems for various applications. It also provides consultancy and training services to customers in the container glass manufacturing industry. GPS offers both all-inclusive and modular concepts,

PROVIDING COMPLETE SERVICE - BOTH HARDWARE AND SOFTWARE

As a full-service company, GPS does not just provide the machine hardware but also the necessary software. Timer&Drive is a compact system for end-to-end process control that is unrivalled in the container glass industry for its reliability, ergonomics, user-friendliness and price. This innovative system can be integrated in any IS machine, and not just GPS-brand machines.

COMPANY MOTTO

“Making glass is an art. The tools you need are made by GPS” is the German specialist company's motto. It is founded on 90 years of experience, sector expertise and insider know-how. GPS has its roots in the glass industry as a
